

Supernova

On Cleos first day at St. Aloysius Gonzaga Academy, things get pretty weird pretty fast. After being confronted by a strangely hostile boy, she meets two girls and instantly bonds with them. Before long danger threatens the entire student body, in the form of a soul eating possessor fae. When her brother is savagely beaten and left in a coma, the girls decide to use their fae powers to become superheroes and stop the possessions. They quickly learn things are a lot more complicated than they had ever imagined. A government plot that had begun when they were infants endangers them all, and a demented former soldier bent on revenge is after them. The line between friend and foe has become so blurry, Cleo has no idea who she can trust. Will their superhero plot help them save the day, or just get them killed?
