

2016-2017 Basic and Clinical Science Course (BCSC), Section 10: Glaucoma (Basic & Clinical Science Course (BCSC))

Major revision for 2016-2017! Provides a comprehensive discussion of glaucoma, including epidemiology and the social and economic impacts of the disease; hereditary and genetic factors; intraocular pressure and aqueous humor dynamics; and clinical evaluation and surgical therapy. The various classes of medical therapy for glaucoma are described in terms of efficacy, mechanism of action and safety. Contains numerous images illustrating disease entities and surgical techniques. Enhanced with eight new surgical videos. Both print and eBook users have access to the videos. Upon completion of Section 10, readers should be able to:

- *Identify the epidemiologic features of glaucoma, including the social and economic impacts of the disease
- *Describe the clinical evaluation of the glaucoma patient, including history and general examination, gonioscopy, optic nerve examination, and visual field
- *Describe the clinical features, evaluation, and treatment of primary open-angle glaucoma and normal-tension glaucoma
- *List the various clinical features of and therapeutic approaches for the primary and secondary open-angle glaucomas

Section chair: Christopher A. Girkin, MD
Print: 252 pages
CME Information The American Academy of Ophthalmology is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. The American Academy of Ophthalmology designates this enduring material for a maximum of 10 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity. The American Medical Association requires that all learners participating in activities involving enduring materials complete a formal assessment before claiming CME credit. To assess your achievement in this activity and ensure that a specified level of

knowledge has been reached, a posttest for this section of the Basic and Clinical Science Course is provided. A minimum score of 80% must be obtained to pass the test and claim CME credit. Visit CME Central for more information. About the BCSC The Academy's Basic and Clinical Science Course™ (BCSC) is ophthalmology's definitive compilation of scientific research and clinical experience. It is continually updated by a faculty of more than 80 expert ophthalmologists. Each of the 13 volumes includes fundamental clinical knowledge; numerous tables, photos and illustrations; self-assessment questions with answers; and opportunities for earning AMA PRA Category 1 Credit™. Beginning with the 2013-2014 edition, the Academy and the European Board of Ophthalmology (EBO) have partnered to make the BCSC the standard text for all European ophthalmology training programs. The EBO now recommends the BCSC as the primary educational resource for European trainees and ophthalmologists studying for the annual EBO Diploma Exam.
