

ACSM GETP, Reference Cards

This reference card collection contains tables and figures from ACSM Guidelines for Exercise Testing and Prescription, Fifth Edition, to make it easy to refer directly to detailed information found in the text. The authors have designed these cards as an appropriate study tool for the clinical or health/fitness student, with information necessary for certification such as classifications for blood pressure, cholesterol, or serum triglycerides, as well as Body Mass Index tables. Professionals will find them handy for patient education during exercise testing, and also in the training of new cardiac rehabilitation employees
