

## Airhead In Space: Planet 3, Adventures In The Seventh and a Halfth Dimension (Volume 1)

Airhead In Space is the hilariously improbable, steampunk fantasy Sci-fi adventure story of a crash test dummy from the twenty-third and a halfth century whose brain is stolen by aliens and sent to the seventh and a halfth dimension to be re-programmed. Lance Von Prums unique writing style and sense of humor paint vivid images in the mind of the reader, often with a quirky twist resulting in spontaneous laughter. The storyline involves female androids, a digital cutie, post-contemporary social icons, lots of pop culture references and an ex-wife to top it off. The theme is somewhat adult but always in a humorous nature, never rude or crude, entertaining for sure. The plot unfolds as Airhead searches for his stolen brain. His ironic existence continues to promote smiles and laughter as he gathers clues to his brains location. The total over-the-top absurdity of every scene only adds to the enjoyment. Lance Von Prum claims his number one reason for writing is to make others laugh and to bring a bit of happiness to the lives of his readers. Airhead In Space delivers as promised and has to be one of the funniest books youll ever read. Von Prum has also written nearly a dozen other books, both fiction and non-fiction, including his hilarious autobiography, I Died, But I Got Better, available as eBooks on Amazon, search for Lance Von Prum. There are future Airhead episodes in the works. Check out vonprum.com and whoisairhead.com to find out more about Lance and Airhead, not one and the same.
