

Architecture Words 5: Form, Function, Beauty = Gestalt

Max Bill (1908-1994) a product of the Bauhaus at Dessau, pupil of Walter Gropius, Vasily Kandinsky and Paul Klee was a virtuoso designer whose work overlapped disciplinary boundaries, encompassing architecture, painting, sculpture, industrial and graphic design, as well as education. What unites all the work is a clarity and precision of expression. Through both his designs and his writings Max Bill has long been a major figure of reference in the German-speaking world. This collection makes many of his key texts available in English for the first time. Architecture Words is a series of texts and important essays on architecture written by architects, critics and scholars. Like many aspects of everyday life, contemporary architectural culture is dominated by an endless production and consumption of images, graphics and information. Rather than mirror this larger force, this series of small books seeks to deflect it by means of direct language, concise editing and beautiful, legible graphic design. Each volume in the series offers the reader texts that distil important larger issues and problems, and communicate architectural ideas; not only the ideas contained within each volume, but also the enduring power of written ideas more generally to challenge and change the way all architects think.
