

The Flight of the Black Stork

Flight of the Black Stork is about the ultimate tragedy of right versus right. When their ancient civilization approached its end, the aliens prayed for salvation. Their god heard the prayers of his chosen people and gave them a promised land for their deliverance. Unfortunately, it was Earth. When extra-terrestrial ships jump a battle damaged B-24 returning from a strike over Germany, Tuskegee Airmen flying escort aggressively fight off the attack in their Red Tailed P-51s. This engagement marked the beginning of the alien fifty-year reconnaissance and invasion plan. A daring surprise attack is launched against the enemy-staging base in the Moons Aitken basin using the Black Stork, a Russian space shuttle resurrected from the bone yard, bristling with biochemical and nuclear weapons. Be prepared for a punch in the gut as each chapter slams you with a high G afterburner climb of mounting action, inspiring imperfect characters and a steamy, love story riding in the rear cockpit. The breathtaking finale thunders with history, hope, and guts and you'll be thinking about this book for a long time.
