

Proceedings of Iced11, Vol. 5: Design for X, Design to X (Proceedings of the 18th International Conference on Engineering Design)

The 18th International Conference on Engineering Design, ICED11, was held August 15-18th 2011 at The Technical University of Denmark (DTU), Copenhagen. The Conference is the flagship event of the Design Society, a society dedicated to contributing to a broad and established understanding of development and design. The ICED series of conferences has a long tradition, which started in 1981 with the first ICED in Rome. A total of 419 papers were presented at ICED11, each double-blind reviewed by multiple reviewers. The papers included research papers and case studies on a variety of topics concerned with design thinking, theory, and practice, with a premium placed on evidence-based research. The papers are published in a total of ten volumes of Proceedings, in addition to electronic publication. This volume contains 35 papers concerned with Design for X, Design to X, where X can represent a variety of attributes of the designed product or system - manufacturability, reliability, sustainability, efficiency, robustness and so on.
