

Dietary Fuelling of Performance Dogs

Learn key points to consider for the feeding of any performance dog, but more specifically, for YOUR performance dog. Understanding the type of dietary fuel used by muscles being asked to perform at certain events is just one consideration. What type of fat is best, what to feed and when to feed it are some of the things that can turn a performance dog into a super-star. This is not a one-size-fits-all approach. You need to understand what's happening when your dog's performance isn't what it could be before you can make the required changes. In fact, you need to understand what the activity itself is demanding of your dog's muscle energy, how to replenish it and when and how to give it a boost at the right time. If you have a performance dog or are interested in fueling muscles properly for any event, this is the booklet for you!
