

Product Design: Graphics with Materials Technology (Advanced Design & Technology for Edexcel)

Advanced Design and Technology for Edexcel is a series designed to support Edexcel's Advanced specifications for Design and Technology. Each book follows the structure of the specification and provides students with the knowledge and understanding they need to prepare for assessments. Advanced Design and Technology for Edexcel is a series designed to support Edexcel's Advanced specifications for Design and Technology. Each book follows the structure of the specification and provides students with the knowledge and understanding they need to prepare for assessments. * advice on how to use the book and how to plan, organise and manage work throughout the course; * a summary of expectations for each unit explaining what students are expected to do, what they will learn and how the unit is assessed; * detailed content for each unit; * tasks to help students understand issues such as industrial practices, to give practice in some aspects of designing and manufacturing, or to help practise specific skills; * factfile boxes explaining technical terms or illustrating points in the text; * to be successful boxes in coursework units to show students what they must do to meet the assessment criteria; * student checklist/practice exam questions at the end of units to help students check the progress of coursework and revise and prepare for exams.
