**A study of electrodynamics of moving media - IEEE Xplore Document** In the general setting of the problem, the explicit compact formulae are derived for the ponderomotive forces in the macroscopic electrodynamics of moving media.

**Electrodynamics of Moving Media SpringerLink** Nature. October 1958 , Volume 182, Issue 4642, pp 1045-1045.

Electrodynamics of Moving Media. Authors Authors and affiliations. V. C. A. FERRARO. V. C. A. **Electrodynamics of moving media and the force on a current loop** Electrodynamics of Moving Media and the Theory of the Cerenkov Effect a swiftly moving charged particle in a medium of dielectric constant  $\epsilon$  and **Electrodynamics of Moving Media and the Theory of the Cerenkov** **An invariant theory of the electrodynamics of moving media** Is Part Of: Radio Physics Electrodynamics of Moving Media Massachusetts Institute of Technology, Research Laboratory of Electronics, Quarterly Progress **Electrodynamics of Moving Media - Paul Penfield, Hermann A. Haus** Abstract. The recent formulations on electrodynamics of moving media proposed by some authors are reviewed. It is pointed out that all these apparently new **Electrodynamics of moving media and the Cerenkov** - IOPscience Electrodynamics of Moving Media. Front Cover. Paul Penfield, Hermann A. Haus. M.I.T. Press, 1967 - Electrodynamics - 276 pages.

**Electrodynamics of Moving Media** Electrodynamics of moving media and the theory of the Cerenkov effect. BY B. D. NAG AND ABUL MAKSUD SAYIED. Institute of Nuclear Physics, Calcutta. **Electrodynamics of Moving Media and the Theory of the** - jstor The answer to a previous question suggests that a moving, To close the loop, Andrew, the answer to your newest question is: The best and : **Electrodynamics of Moving Media (9780262160193)** The object of this paper is to find the equations for the electric and magnetic intensities  $E$  and  $H$  in a homogeneous medium moving with a uniform velocity, from **Present views on electrodynamics of moving media - IEEE Xplore** Recently there has been an increase of interest in the electrodynamics of moving media. This is primarily due to the emergence of new

experimental possibilities **A Study of Electrodynamics of Moving Media - IEEE Xplore** Recently there has been an increase of interest in the electrodynamics of moving media. This is primarily due to the emergence of new experimental possibilities **Ponderomotive forces in electrodynamics of moving media - DOIs** the branch of electrodynamics that studies electromagnetic phenomena in moving media, particularly the laws governing the propagation of electromagnetic **Electrodynamics of moving media inducing positive and negative** **Whats a good reference for the electrodynamics of moving media?** Is Part Of: Electrodynamics of Moving Media Radio Physics Massachusetts Institute of Technology, Research Laboratory of Electronics, Quarterly Progress **Electrodynamics of Moving Media Article about Electrodynamics of** Electrodynamics of Moving Media. Paul Penfield and Herman A. Haus Reviewed by E. N. Parker. American Journal of Physics 36, 468 (1968) doi: **Catalog Record: Electrodynamics of moving media. Report of** Abstract: The recent formulations on electrodynamics of moving media proposed by some authors are reviewed. It is pointed out that all these apparently new **Electrodynamics of Moving Media** The object of this paper is to find the equations for the electric and magnetic intensities  $E$  and  $H$  in a homogeneous medium moving with a uniform velocity, from **none** Electrodynamics of Moving Anisotropic Media: The First-Order Theory c. T. Tai. Contribution From the University of Michigan Radiation Laboratory, Ann Arbor, Negative refraction is a phenomenon that has been recently reported with left-handed media (either isotropic or not), photonic crystals, and **Electrodynamics of moving anisotropic media: The First - NIST Page** In the general setting of the problem, the explicit compact formulae are derived for the ponderomotive forces in the macroscopic electrodynamics of moving **Electrodynamics of Moving Media: Physics Today: Vol 21, No 10** Electrodynamics of Moving Media.
