

Employee Motivation (Career Development Skills) (Volume 11)

There is therefore a challenge for all employers and management in delivering the right balance between a confident, motivated workforce and a workforce which is driven to attain goals. It can be described as a mix between the pleasure of a comfortable working environment and the fear of failure, although in honesty it is more complicated than that equation suggests. Regardless of how it is characterized, it is important to get the right balance in order to ensure that you have a motivated workforce. This book is designed to show you the way to get the best out of a confident, motivated set of employees, and to show them how to motivate that group.
