

Ethics Handbook for Energy Healing Practitioners

Ethical principles are far more than mere rules or regulations - they are maps for bringing out your best as a caregiver and healer. Responding to a lack of articulated or standardized ethical guidelines for energy healing practitioners, David Feinstein, PhD, and Donna Eden developed a professional curriculum that has become one of the country's most successful and effective energy medicine certification programs. Now, this comprehensive, case-oriented guide allows veterans of the field and newcomers alike to work through a wide range of ethical dilemmas before they arise, helping you to prevent professional errors that could hurt you, your clients, and your practice.
