

Eyesometry

Eyesometry is the result of one photographer's attempt to gather his thoughts after having worked in the wedding and family photography business for a few seasons. A book was not the intent, but a book was the result nonetheless. Eyesometry is both a photographic style and a company founded by the author. Eyesometry is the practice of creating the illusion of a third dimension to what is actually a two-dimensional medium. The eyesometric style of photography is the attempt to take it to the next dimension and capture the fourth dimension of people, the soul.
