

Faiths Demands

In a world full of creatures beyond imagination, Allys has been lucky. From a large affluent family, and a close knit community, she has a satisfying, if somewhat invisible, life. She gets her fill of adventures and excitement from the multitudes of books that her loving father provides. Her family is her entire world, and she takes care of them as if she were indeed their guardian and not just the eldest daughter. However, as sheltered and happy as her world has been, even Allys cannot ignore the ominous tidings that are manifesting. Crops are withering, beasts have stopped producing and living things are beginning to show signs of stress and decay. Her little village, her entire world, is dying before her eyes. Her father has been drawn to many council meetings in an attempt to find a way to aid the struggling families. The council has been searching for a means to avoid the seemingly inevitable collapse of civilization. One solution is all they have left. There will be a choosing. One child, chosen to save all. One small tiny chance to save the entire world. One single person on whose shoulders rests the fate of everything and everyone. That single person will go to the Ancients to face whatever wrath is to be set upon them, they will beg for the lives of every single person that they have left behind, they will go ... and they will not return. Allys is willing to die a thousand times if it will save her family and loved ones. As the choosing commences, however, it seems that she may only have to do it once. Chosen, she goes out to save the world. In the process, she discovers a far more vast and unusual place than any of her books could have ever conveyed. Creatures of every size, from the tiniest, sweet mollip to the largest unnameable monstrosities with fangs, drool and appetites to match, and everything in between, lurk in the darkest recesses. Spectacular beings, such as the light,

intelligent Spritelings brighten the journey with their witticisms and also surprise with their fearsome skills in battle. Large barbarians dominate well anything they choose to. Discovering new friends along the way, Allys also finds a new sense of truth. If she must die to save the world, why does no one else know about it? Why do not a single one of her new-found friends know of the Ancients or of this choosing? Her sheltered view of the world is stripped away and Allys is forced to accept that she must trust in herself rather than anything she has been taught to believe. The farther Allys goes into her quest, the farther she finds herself from everything that she has known thus far. No longer can she be the sheltered, accepting, complacent person that she has always been. There are more questions than answers and the answers that she does have are unsatisfying and questionable in themselves. There is no clear way to proceed, and no way to go back. As the chosen, Allys has to make a choice of her own. On one side of the scales, she can do as she has been told by those she has trusted all her life, knowing it will lead ultimately to her demise. On the other side, she can search out the source of the rumors and edicts that have shaped her world and tear apart not only her own beliefs, but those of everyone she loves. Allys choice, and her journey through not only a lush new world, but also through her own maturity and growth will lead her ultimately to face down an enemy that even heroes fear to confront: herself.
