

## In Focus: National Geographic Greatest Photographs

National Geographic Greatest Portraits tells the story of portrait photography through the eyes-and words-of five accomplished National Geographic photographers. The book showcases images never-before-seen alongside award-winning favorites. New and fascinating text reveals photographers individual experiences photographing people and their evaluation of NG portraits produced during each decade—from the late-19th century until today. National Geographic Greatest Portraits opens with a beautiful and surprising look at National Geographics contribution to the knowledge of the worlds peoples through photography. Five chapters follow, each spanning approximately two decades and covering an era in world history and photographic style. The chapters are: Before 1930 (Exploring the power of photography), 1930s-1940s (The Great Depression and World War II), 1950s-1960s (Bright colors and perky smiles), 1970s-1980s (Back to realism), 1990s-Present (Everything is relative). Each of these chapters is a portrait of the world.
