

The bulb book; or, bulbous and tuberous plants for the open air, stove, and greenhouse, containing particulars as to descriptions, culture, ... corms, tubers, or rhizomes (orchids excluded)

The bulb book; or, bulbous and tuberous plants for the open air, stove, and greenhouse, containing particulars as to descriptions, culture, ... corms, tubers, or rhizomes (orchids excluded)

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1911 Excerpt: ...Imperials like a deep rich loamy soil, and are suitable for the margins of shrubberies, flowerborders, etc. They look very handsome in bloom, but emit such a strong odour when cut that they are known in some parts by the appropriate but uncomplimentary name of Stink Lilies. They are easily several garden varieties with fancy increased by means of offsets. names. Fig. 150.--*Fritillaria vmperialis*, seed-pods. (&.) *F. involucrata*--A species from the Maritime Alps about 1 ft. high, having whorls of narrow lance-shaped leaves and wine-purple flowers slightly tessellated. *P. Karelini* (*Rhinopetalum Karelini*).--An Asiatic species about 6 ins. high, with broad stem-clasping leaves, and terminal racemes of nodding bell-shaped flowers about 1 in. deep, produced late in autumn or in spring according to the time of planting. The blossoms are pale purple with deeper purple spots and veins, and a greenish-yellow nectaryhollow at the base of each segment. (*Bot. Mag. t. 6406.*) *P. lanceolata*--A native of N.W. America, 1 to 1j ft. high, with lanceshaped leaves in whorls, and sombre wine-purple coloured flowers. *P. latifolia*.--A variable Caucasian Fritillary about 1 ft. high, with drooping flowers varying in colour through various shades of purple, black, lilac, and yellow. There are Fig. 151.--*Fritillaria lanceolata*. The best known is *F. lutea*, 6 to 12 ins. high, with alternate linear lance-shaped leaves, and solitary drooping yellow flowers more or less tinged with purple, produced in April and May (*Bot. Mag. tt. 1207, 1538; Belg. Hort. i. 49; Red. Lit. i. 57.*) *P. macrandra*.--A native of the Island of Syra, with oblong lanceshaped fleshy leaves, and purple flowers covered with a glaucous bloom outside, but yellow and
