

Greenhouse Gardening (Aura Garden Handbooks)

This informative series of handbooks is planned for easy reference, packed with facts and illustrated throughout in full colour. The authors are all experienced gardeners who write with authority on the possible pitfalls as well as the joys of many different aspects of gardening. Taken together, the books build into an indispensable library which will be referred to on countless occasions by both the newcomer to gardening and those more experienced who are, perhaps, interested in more specialist plants.
