

Have Robot, Will Travel: The New Isaac Asimovs Robot Mystery

A human has been murdered on Kopernik and the clues point toward a robot as the killer. But how can that be, when robots are programmed to never bring harm to humans? Before long, roboticist Derec Avery is on his way to Kopernik to investigate. Former Auroran ambassador Ariel Burgess, meanwhile, has a mystery of her own to unravel: Citizens of the Nova Levis colony have been disappearing in greater numbers, while the cyborg population has suddenly started growing at a dramatic rate. With the help of old friends and potentially new enemies Derec searches for the identity of a killer, unaware that Ariel is walking directly into the center of the web of intrigue.
