

## How to Look At Sculpture

From the Preface: It is my hope that through this book I can share with readers the excitement I feel in looking at sculpture all over the world. This is a general book on how to appreciate sculpture, not a lesson on any particular period or school or artist. It is not intended as a historic or comprehensive view of the art of sculpture, but rather as a collection of impressions and experiences accompanied by photographs that show what I have found in some of my own explorations. If readers will be inspired to look with a searching eye, think with a probing mind, and feel with a receptive heart, I know they will be enriched by what they see, and over a period of time the beautiful harmonies of forms they encounter will become part of their inner being.
