

In The Artists Words: Quang Ho on the Evolution of Seeing

Quang Ho discusses the evolution of seeing and how that has changed over the centuries. We dig deeper talking about the three levels of seeing that a painter experiences. Quang explains how seeing is important to all aspects of the painting--value, color, form, texture, shapes, and their relationships. We also talk about the meditative side of painting--the Zen of painting and how important it is to just let it happen once we are in that zone.
