

The Infrared Nude

Please note that this book contains artistic images of the female nude and is recommended for ADULTS only. In many ways this book came into existence because of my earlier book, Experiments in Infrared. I included a few unaltered images of people in that book to give the reader an idea of what they could expect if they photographed people in infrared. One reader came to the conclusion that when shooting infrared that people in the images should be avoided, possibly because they looked horrible. Of course people can look quite nice in infrared (and horrible if you wish) depending upon the vision and execution of the photographer. So, to demonstrate that, I hired a model and created the following images using an infrared camera. All the images herein were created with a pre-conceived notion of what I wanted the images to look like, somewhat surreal and dreamlike but without going to extremes. I hope you enjoy the images.
