

# Gun Screening in the Doctors Office (Adult Guide: Health Screening and Prevention Book 3)

Many doctors have begun asking questions about gun ownership and mental health during routine checkups. Many people are confused about the reasons for this, their rights, and the legality of this screening process. This handbook is designed to help answer these questions, as well as to help you understand the warning signs of gun violence and know when it might be right to talk to your doctor about your concerns. Gun violence is a growing epidemic in our country and is as much a medical emergency as a fatal outbreak of disease. By screening in advance for warning signs of violence with the help of your doctor, you can help prevent unnecessary deaths and suffering and live a safer, longer life.
