## Unearthed (The Pactem Orbis Legends) (Volume 1)

Gemma Alexandra Pointe is not a fitting name for a warrior, a vigilante, or a mystic. One would never hear the name and assume it belongs to a powerful person, like an influential politician or religious leader. And it certainly doesnt sound like the name of a supernaturalan angel, a mermaid, or a fairy godmother. But thats what I am: a supernatural. In the first of Karen Seymours epic Pactem Orbis Legends, there are no heroes or saviors. There is only Gemma, an introspective college student, and the new reality shes forced to face when a mysterious, green-eyed stranger shares a secret: Shes an Essen, like him. Descended from elementals, and soon-to-be giftedon her twenty-first birthdaywith superpowers. But Malakai Zonn also believes shes the Link, prophesized to possess a weapon powerful enough to destroy the Essens mortal enemies, spirit-beings known as the Reluctant to participate in a Dothen. supernatural war and desperate to preserve the life she knows, Gemma must choose: normal or supernatural, safety or greatness, love or duty. Her choices are as complicated as they are permanent, and in order to thwart evil, the secrets of the pastand Gemmas true purposemust be unearthed.
