

Program Evaluation: Forms and Approaches

Accountability is important to both public and private sectors, and administrators are increasingly obliged to use programme evaluation to assess and justify their operations. This book provides an introduction to evaluation methods and the issues involved. It uses extensive Australian examples and should prove an invaluable tool for new and experienced evaluators in business, welfare, health, education and elsewhere. Drawing on current research, this book presents an original framework for the identification of appropriate forms and approaches. It examines the role of evaluation in programme development and offers techniques for involving stakeholders in the planning process and for disseminating the evaluation findings.
