

Puddle: A Tale for the Curious

Puddle is a tale for the curious, the lover of plants, and the healer inside each of us. It is for those of us who notice the little details, such as reflections upon tranquil water. Here is a story that celebrates the power of stories, and knows that solid connections can be made over meals, especially woodland-foraged meals. Birch loves her garden. Her sanctuary is the nearby forest. She understands that adventures can happen at any moment, especially when there are cats involved. When she witnesses a boy crawl from a puddle that wouldn't cover a toad, she suspends her disbelief in order to see his side of the tale. Get your feet wet with Birch and Puddle as they travel to worlds by way of the reflections upon puddles. Prowl with Caht, the cat who spells its name with an h, and arrange necessary... encounters.. with Nimupara, the Watcher of Worlds. Dance all night with the Trees, as they share their stories and their secrets. And listen to the land. Join the fireside for conversations concerning science and magic (which is often science that has not been explained yet). Review facts, and wonder about wonderful perhapses. Celebrate life, love, joy, health, healing, and the nonjudgmental approach to life that is common among trees.
