

## Behind the Gem

Ripped from heart and home by galactic farmers, Ray and his co-workers are taken hundreds of light years across the galaxy and left to fend for themselves. When he begins hearing a voice in his head and is unjustly blamed for the deaths of his friends, he is separated from them and is led to a gentle race of aliens called the Draasen. He experiences a new way of life with responsibilities and challenges he never could have imagined. He is accepted into their society, but at a high cost to his dignity when he is led into protecting and birthing their eggs. When the galactic farmers arrive to take the Draasen population as fodder, the Draasens fate becomes entwined with that of the nearly extinct human race and their mutual struggle to survive.
