

SKETCHBOOK: Concepts from the Virtual World

A collection of conceptual sketches created for a virtual theme park, designed specifically for people all over the world to gather and chat with each other online. Don Carson's experience as a designer of Disney theme park attractions made him an appropriate candidate for bringing that design sensibility to the computer. Sketchbook from the Virtual World visually explores the possibilities available for transporting an audience to themed places, while sitting comfortably behind their computer screens. Places that create a sense of Story, and invite others to build on the fictitious histories they suggest. Revised Edition includes, 50 black & white concept illustrations and 7 pages of color screenshots, chronicling the design of virtual interiors and exteriors
