

## The Oscanian Theory Series

Keith O. Williams returns to the writing circle after a two year absence to bring you a series reports on studies done over the last five years. As a psychology major, Williams have done research on the topics such as mental health, family development, and religion. He wants the world to know more about his research so that awareness can be raise on the complexity and treatment of mental illness around the world. If I can make a difference in the world, this is it, said the established author. With research comes awareness. With awareness comes testing. And testing comes a breakthrough. Williams hope this path will provide a new discovery in mental health and religion: One person at a time.
