

Jobs in America

Is America herself being downsized or are the changes in the work force and standards of living of her citizens going to go up, down or nowhere because of it? Is anyone doing anything about it? Should the welfare reforms going on in some states be national and it welfare people are required to work - what if there are no jobs? Will it be a country of relatively affluent and nervous suburbs surrounding heavily armed and anxious poor inner cities or will it be a country where the citizens all have a chance to live decent lives? This book brings together contributions which try to deal with some these crucial questions. The programs described here and those programs and efforts being ignored or discredited will do much to shape Americas future.
