

Step-by-step Pottery and Ceramics

Although this highly visual book is aimed primarily at those who are just beginning to learn the craft of ceramics, the advanced techniques and information it contains will ensure that it also appeals to established ceramicists. Step-by-step instructions, accompanied by full-colour photographs, throwing on the wheel and moulding to decorating, glazing and firing. Throughout the book, interviews with leading ceramicists provide inspiration and demonstrate the many different directions the craft can take. There is a comprehensive list of equipment and suppliers at the back of the book as well as clay and glaze formulae which will enable materials to be mixed easily. This book, with its emphasis on bold colours, contemporary geometric designs and interesting techniques such as sponging and marbling, should inspire ceramicists to create a host of highly individual pieces.
