

George Washington: In Portrait and In Words

Charles Wilson Peale had access to General Washington both because of his involvement in the two battles at Trenton and Princeton, but also because of his work as an artist. Peale combined both the experience of a soldier and the skill of an artist. These are two skills which have rarely been brought together in early American culture. Although the battle of Princeton had already been over, Peale approached Washington for another portrait. He had already painted one portrait of Washington during the Princeton battle, but this would be a portrait of the personality and character of the great general and president after the battle.
