

## The Time Machine (Wisehouse Classics Edition)

THE TIME MACHINE is a science fiction novella by H. G. Wells, published in 1895. Wells is generally credited with the popularization of the concept of time travel by using a vehicle that allows an operator to travel purposely and selectively forwards or backwards in time. The term time machine, coined by Wells, is now almost universally used to refer to such a vehicle. The books protagonist is an English scientist and gentleman inventor living in Richmond, Surrey, in Victorian England, and identified by a narrator simply as the Time Traveller. The narrator recounts the Travellers lecture to his weekly dinner guests that time is simply a fourth dimension, and his demonstration of a tabletop model machine for travelling through it. He reveals that he has built a machine capable of carrying a person through time, and returns at dinner the following week to recount a remarkable tale, becoming the new narrator. . .
