

OLDER THAN 60? THE THREE MOST DEADLY CONDITIONS & THEIR PREVENTION

As you get older (past 60) your hormones, immune system and digestion no longer work as good as it did when you were 30. You are not probably as optimistic and happy as when you were younger. Also you are probably not getting the nourishment from your food that you need. This is the main reason it is easier as you get over 60 years of age, to get cancer, diabetes, heart trouble, which are the three biggest killers. Most people rarely had any of these problems before 60. I want to make your body think and feel that you are 30 years old as mine does.
