

Project Butterfly (Project Butterfly Series) (Volume 1)

Kwan is a political prisoner at Camp 22, Aradia is a mental patient at Serbsy Centre and the twins 164XY and 626XY are a product of a lab. They are all property of their governments to experiment on at will, hidden away from the public's eye. After years of her emotions being repressed Aradia begins dreaming again, against the Doctors knowledge. Suddenly the impossible seems imaginable and revolution is imminent. Project Butterfly is the first installation of a series of books of Sci-fi Thrillers based on actual experiments on the human mind: A tale of horror, the supernatural, human nature and rebellion. A fascinating look at mind experiments encased in a pacy, well-written novel. A finalist and highly recommended. The Wishing Shelf Awards
