

## Visions of Oleanna - Volume Two: Featuring the Fantastic Photographic Art of Frederick Potter

This is the second volume in a series of fine art photo books featuring the incredible beauty and modeling talent of Oleanna. Oleanna is a Ukrainian glamour model who has made her unforgettable impression on the world of erotic art. Her talent is more than physical as a truly great model has the capacity to portray a wide range of emotions and styles. Here are examples of a variety of genres from the retro pinup style to incredible fantasy images that challenge the imagination. Both studio and location images are here as well as some fantastic digital masterpieces that will remind the reader of Frazetta and Boris paintings. Oleanna is published in over eight different countries, has been the subject of gallery exhibits, has posed for commercial and artistic magazine spreads and was the first model to have a four page spread of her images published in Heavy Metal Magazine. The CTV television network did a special segment on her for their Alberta Prime Time segment and web sites from around the world have featured her on their pages. Her modeling has even made it to Afghanistan where she sent over 4,000 special postcards to the troops featuring a retro pinup image created just for them. Her fan site [www.Oleanna.com](http://www.Oleanna.com) received hundreds of letters from the troops thanking her for her outstanding support. If you are a collector of fine art erotica, you will want at least one of the Visions Of Oleanna series in your collection. Each page features a full color reproduction of some of her best work. Together with Frederick Potter, an internationally celebrated photo artist, this collection will be a treasure for the library of any serious collector. The decision was made to produce several smaller books instead of one large one so that anyone can afford to have at least one of these amazing photo art books in their collection. These images will be remembered as some of the finest photo art from this generation.
