

Here Was Charlie If

A funny thing happened in a parallel universe. Charlie awakens from anesthesia in a dark cavern. A science team was supposed to be on hand to greet him, but they're nowhere to be found. He doesn't know what strange new world he's entered.

In a lonely corner of Oregon, Melinda sleepwalks through her life. She sees her clients, assists her aging parents, cares for her cat. Forty-one and single, she leads a drab existence. What if something, or someone, changed all that? Charlie reenters Melinda's life and leads her on a quixotic journey up and down the West Coast, across alternate universes, into their mutual pasts, and through the myriad what-ifs of love and fate. In another of his signature comic adventures, Dan Spencer spins a quirky tale about sanity, reality, mortality, and Schrödinger's cat.
